

30 June 2010

The fund aims to provide long term growth by investing in a diversified portfolio of assets and a range of investment managers. These investment managers are selected for their investment expertise in particular markets across the world and are monitored on an ongoing basis. The fund's assets can include equities, fixed interest and property from both the UK and overseas. It aims to be less volatile than the Standard Life Balanced Manager of Managers Fund, investing a higher proportion in assets that are traditionally less volatile (such as fixed interest assets).

The selection and ongoing monitoring of investment managers is currently undertaken by Wilshire Associates* and is based on extensive research with the aim of blending managers with different investment styles. The value of investments within the fund can fall as well as rise and is not guaranteed – you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate. The Sterling value of overseas assets held in these funds may rise and fall as a result of exchange rate fluctuations.

*Please note that Wilshire Associates does not select fund managers for any property exposure. The property exposure is currently managed by Standard Life Investments.
