

30 June 2010

The Fund is intended to provide market leading returns from a portfolio of money market instruments and invests not only in bank and building society deposits but also in a variety of other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs) where, when purchased, repayment is typically expected within 3 years.

The fund price is not guaranteed by Standard Life and there could be circumstances where the fund price may fall. A fall might happen if, for example, there is a default by one of the banks where some of the money is held or where there is an adverse market movement in the value of one or more of the securities held due to for instance a credit event or where the anticipated repayment term of an asset is extended.

Life Fund

Money Market Fund
