

30 June 2010

The fund aims to provide long term growth by investing in a portfolio of UK and overseas equity assets. The proportions held in each component are decided after reviewing the prospects for each market and will vary from time to time around the long term strategic asset allocation of 50% in UK equities and 50% in overseas equities. Both the UK and overseas components are actively managed by our investment team to try to take advantage of opportunities they have identified.

The value of investments within the fund can fall as well as rise and is not guaranteed – you may get back less than you pay in. The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate. The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.
