

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investment Grade Corporate Bond Fund, a Sterling denominated sub fund of the Standard Life Investment Company, Retail Accumulation Shares (ISIN:GB0004330048). This fund is managed by Standard Life Investments (Mutual Funds) Limited.

Objectives and Investment Policy

The fund aims to generate an income, before charges, above that available on UK Government bonds by investing mainly in Sterling denominated corporate bonds.

The fund is actively managed by our investment team who may also invest a proportion of assets in other bonds (e.g. gilts) and/or money market instruments to try to take advantage of opportunities they have identified.

The fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different

to those that could be achieved through investment in assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

Any income, for example interest income, received by the fund will be reinvested.

Investors in the fund may buy and sell shares on any normal business day.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

Risk and Reward Profile

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes.

The lowest rating does not mean risk free.

The fund is rated as {4} because of the extent to which the following risk factors apply:

- (a) The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- (b) The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- (c) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses. The fund makes routine use of derivatives.

- (d) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.

The fund employs a single swinging pricing methodology to protect against the dilution impact of transaction costs. A change in the pricing basis will result in movement in the fund's published price.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Charges

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One off charges taken before or after you invest

Entry charge:	4.00%
Exit charge:	0.00%

This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Standard Life Investments (Mutual Funds) Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure reflects the amount based on expenses for the year ending 28/2/2017. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

For more information about charges, please see the Prospectus which is available at www.standardlifeinvestments.com.

Performance has been calculated over the stated period based on the share price of this share class. It does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Past performance is not a guide to future performance

The fund was launched in 1998. The share class was launched in 1998.

The performance of the share class is calculated in Sterling.

The fund's name was changed from 25 September 2015 to better reflect the investment objective and policy of the fund.

inconsistent with the relevant parts of the Prospectus for the Standard Life Investment Company.

Other share classes are available in the fund and further information about these can be found in the Standard Life Investment Company Prospectus.

Standard Life Investment Company is an umbrella structure comprising a number of different sub funds, one of which is this fund.

This document is specific to the fund and share class stated at the beginning of this document. However, the Prospectus, annual and half-yearly reports are prepared for the entire umbrella.

The assets of a sub fund within the umbrella belong exclusively to that sub fund and shall not be used or made available to discharge (directly or indirectly) the liabilities of, or claims against, any other person or body including Standard Life Investment Company and any other sub fund. Any liability incurred on behalf of or attributable to any sub fund shall be discharged solely out of the assets of that sub fund.

Investors may switch their shares in the fund for shares in another sub fund within the Standard Life Investment Company. For further information please refer to the prospectus (section on 'Switching') which can be found at www.standardlifeinvestments.com.

The Standard Life Investment Company and Standard Life Investments (Mutual Funds) Limited are authorised in the United Kingdom and regulated by the Financial Conduct Authority. This Key Investor Information is accurate at 12/1/2018
