

30 June 2018

The fund aims to provide income, with some capital appreciation over the longer term. It invests predominantly in global commercial property markets and can invest in both direct and indirect property. It is actively managed. The indirect property investments can include investment in REITs and other quoted and unquoted property companies and property collective investment schemes. Selling property can be a lengthy process so investors in the fund should be aware that they may not be able to sell their investment when they want to.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment. The fund may use derivatives to reduce risk or cost, or to generate additional capital or income at low risk. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks. The value of assets held within the fund may rise and fall as a result of exchange rate fluctuations.

Fund Performance *

Price Indexed

The performance of the fund has been calculated over the stated period using bid to bid basis for a UK basic rate tax payer. The performance shown is based on an Annual Management Charge (AMC) of 0.90%. You may be investing in another shareclass with a higher AMC. The charges for different share classes are shown later. For details of your actual charges please contact your financial adviser or refer to the product documentation.

The fund changed benchmark on 1 October 2014 to IPD Direct/MSCI World Real Estate Custom Index. Benchmark numbers are available on a quarterly basis only (31 March, 30 June, 30 September and 31 December).
